

WHAT IS CLAIMED IS:

1. A method for producing a chitosan-containing salt having the function of lowering blood pressure, which comprises the steps of:

- 5 (a) dissolving an acid-soluble chitosan in organic acid, or dissolving a water-soluble chitosan derivative in water, to prepare a chitosan solution;
- (b) spraying the chitosan solution on salt particles to bind the chitosan to the salt particles; and
- (c) drying the chitosan-bound salt particles.

10

2. The method for producing a chitosan-containing salt according to claim 1, wherein the chitosan is α -chitosan or β -chitosan.

15

3. The method for producing a chitosan-containing salt according to claim 1, wherein the chitosan or its derivative has a molecular weight of 10~100kDa.

4. The method for producing a chitosan-containing salt according to claim 1, wherein the organic acid is lactic acid, acetic acid or ascorbic acid.

20

5. The method for producing a chitosan-containing salt according to claim 1, wherein the salt is natural sea salt, refined salt or rock salt.

6. The method for producing a chitosan-containing salt according to claim 1, wherein the salt has the size of 10~50 mesh.

25

7. The method for producing a chitosan-containing salt according to any one claim among claims 1~6, wherein the content of the chitosan or its derivative in the chitosan-containing salt is 1.5~5%.
